

Fall 2023

# AFTER SCHOOL ENRICHMENT

@ *Myers Education Center*  
15 Henning Rd., Saratoga Springs

Grades 3-8  
Register online by 9/22

Thursdays,  
3:45 pm - 5:15 pm

October 5, 12, 26,  
November 2, 9, 16  
(snow day November 30)

Tuition: \$150 per student

## Contraptions / Mr. Jacko

Gr. 4-8

A Monster Truck Rally...Design it, Construct it, and Power it! We will start the class designing and building a car out of wood using real tools. We will then learn how to power your unique creations using small electric motors, rubber bands, balloons, or sails, you decide! The class ends with an epic car race!

## Get Wild / Wilton Wildlife Preserve & Park

Gr. 3-5

Explore the unique plants and animals of the Sandplains ecosystem. Dissect owl pellets, use marshmallows to build beaver lodges, create your own clay bird, touch real skulls and furs, and design your own eco t-shirt. Don't miss out on this wild series!

## Introduction to Chocolate Making / Saratoga Chocolate Co.

Gr. 4-8

Inspire young minds with the magic of chocolate! Taste and play while we learn about this amazing, versatile and delicious "food of the gods." From hot chocolate to lollipops, make-your-own-truffles and everything in between, kids will go home with a delectable dessert every night!

## Nature Art / Children's Museum at Saratoga

Gr 3-5

Think like a scientist and an artist in this creative class. We will explore the beauty of nature using materials found in the great outdoors while learning how their unique characteristics have evolved throughout time to offer specific functions for our environment. This is a hands on artistic adventure filled with fun projects every week!

## Painting Palooza / Paint-n-Gogh

Gr. 3-8

Find your inner artist! This class is all about having fun while learning painting concepts and techniques that will build your confidence and foster your creativity. Students will complete a new masterpiece each session.

## STEM Sampler / MiSci

Gr. 3-6

This class is a mash up of a few great programs designed to introduce students a variety of subjects. Each week we will introduce one of our most popular programs in STEM using hands-on activities. Crime Lab Science, Fun with Physics and Engineering Mission are just a few of the projects we will be working on.
